Title:
International economics and finance

ECTC credits:
10

Semester:
Autumn

Aims:
This is an introductionary course in international economics and finance. We will examine economic models on what determines the exchange rates, the interest rates and the price level. Thereafter, we take a look at a firm's economic exposure for changes in these prices and show how the firm can use financial instruments like forward contracts and options to reduce this exposure.

A guest lecturer from the energy sector will present a case on financial risk management.

Prerequisites:
It is required that the students have acquired skills in the disciplines macroeconomics, finance and mathematics equivalent to the courses SØ6-100, MA6-100 og BØ6-200.

Teaching methods:
Lectures, work in groups and presentations.

Excursions:
None

Course requirements:
One exercise must be approved before taking the examination.

Assessment:
A four-hour written final examination. Letter graces.

Syllabus:
Will be given at the start of the semester.
