February 4, 2004

There are a variety of on-line resources for L^AT_EX-users.

1 T_EX User Group (TUG)

1. T_EX User Group (TUG)
TUG publishes the quarterly newsletter *TUGboat*.
2. Local T_EX User Group (LUG)
There are over a million users of T_EX worldwide, and many of them are involved in local T_EX user groups (LUGs) to improve digital typography for their own languages.
3. Comprehensive T_EX Archive Network (CTAN)
If you need to install a package which does not come with your distribution, the chances are you'll find it on CTAN. This site, which is fully searchable, is maintained by TUG and mirrored by many local user groups around the world. It is a site where users contribute macros, fonts and packages they've developed out of a need which has arisen in their own work.

2 L^AT_EX for Linguists

There are also a number of pages devoted specifically to helping linguists to get the tools they need.

1. L^AT_EX for Linguists
This is a site where linguists who use T_EX may contribute typesetting solutions.
2. UPenn Linguistics L^AT_EX Advice
The Linguistics Department at UPenn have a number of useful L^AT_EX links, including packages which have been developed specifically for linguistics, but which might not be available on CTAN, e.g. [linguex](#) (numbered examples) and [qtrees](#) (syntactic trees).

3. Ling- $\text{\TeX}$
Ling- $\text{\TeX}$ also offers various information about packages, although it hasn't seen a lot of traffic recently.
4. Chris Manning's $\text{\LaTeX}$ page
Check this site out if you need to draw attribute-value matrices.

3 Platform Support

1. Mac- $\text{\TeX}$
Information on editors, front-ends and other $\text{\TeX}$ -related applications for the Mac, both System 8.x and 9.x as well as Mac OS X.
2. Mik $\text{\TeX}$
PC Users look here.
