Facts and Figures 2003-2004

- Studies offered within the fields of Medicine, Pharmacy, Dentistry, Psychology, Law, Fisheries, Science and Mathematics, Social Sciences and the Humanities are organized in 6 faculties
- Four centres coordinate and promote the activity within specific disciplines: Centre for Sámi Studies, The Roald Amundsen Centre for Arctic Research, Centre for Women's Studies and Women in Research (KVINNFORSK), Centre for Environment and Developmental Studies (SEMUT)
- One Centre of Excellence: CASTL – Centre for Advanced Study in Theoretical Linguistics. There are also several other centres organized under the faculties, among others the Centre for Peace Studies and several centres within health research
- The University is also housing a Centre of Further Education and Distance Education (U-VETT), a Department of Learning and Teacher Education, Tromsø University Museum and the University Library
- 6098 students were registered last autumn (2003). 57% of them were women, 69% were from Northern Norway, 22% from Southern Norway, and 9% were foreign students from more than 60 countries outside Norway
- 184 higher level students, 30 master's degree students, and 220 professional degree students graduated in 2003
- 57 doctorates were sat in 2003, comprising 6 dr.art., 9 dr.med., 1 dr.philos., 6 dr.polit., 1 dr.psychol. and 34 dr.scient.
- 1714 man-years, of which 923 are academic. The percentage of women was 46% in total and 36% of the academic staff
- 78084 people visited Tromsø University Museum in 2003. In addition there were non-registered visitors to the Arctic-botanical garden, displays at the University Library and web-displays
- «Teorifagbygget», the new building in Breivika with 38251 m² will open in 2004. With this all the units of the University will be situated on campus, with the exception of the University Museum and Department of Physics
- The budget for 2004 is approximately 1.4 billion kroner

Strategic Fields 2004-2005:

- The University of Tromsø is to make the northern part of the country a prominent region by promoting competence and knowledge through research
- The University of Tromsø is to develop several areas of research within the areas of international research
- The University of Tromsø is to make use of its natural suppositions, with emphasis on the northern and arctic dimension

The following areas will be in focus:

- Marine Studies
- Physics
- Biology
- Medicine
- Questions regarding the Sámi people and other indigenous groups
- Technology
- Languages

In addition, another important area is research in the intersections:

- The Bio Marine
- Biomedicine
- Telemedicine
- Multicultural affairs

Research Awards at the University of Tromsø 2003:

- Gad Rausing's Award of Excellent Research from Vitterhetsakademien in Stockholm is awarded Professor Einar Niemi, Department of History, for pioneer research within the areas of minorities, migration and regional history in Northern Norway and the northern parts of Sweden, Finland and Russia
- The Fram Committee's Nansen Award of 2003 is awarded Professor Asgeir Brekke, Department of Physics
- The Pharmaceutical Association of Norway awarded research scholar Kjersti Bakken, Department of Pharmacy, Pharmacist of the Year for her teaching at the University of Tromsø and for her role as Head of the Pharmaceutical Board of Ethics
- The Brage Award for Best Specialist Literature was awarded Professors Einar Niemi and Hallvard Tjelmeland for the three-volume work The History of Norwegian Immigration
- The Research Council of Norway awarded Professor Bente Træen, Department of Psychology, the Award for Excellent Dissemination of Knowledge
