Hedmark University College

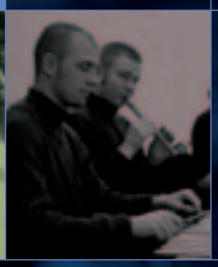

HØGSKOLEN I HEDMARK

Welcome to Hedmark University College!

At Hedmark University College the internationalisation of our institution is one of our top priorities.

A central component in this internationalisation process is the movement of students and staff across national borders.

Although we do think it is fun to send and receive students and staff, we keep in mind that the overall goal of our internationalisation process is to strengthen the academic quality of our institution.

Through international cooperation we are able to exchange the best in our institutions, both academically and culturally, and to explore our own values and traditions. This helps us to develop a comparative perspective at all levels of our institution.

We believe that students and staff who have spent time abroad at a collaborating institution, will be better future professionals. Their international experience is indispensable in today's multicultural and globalised world.

We also believe that our international guests make our institution a more interesting place.

The major obstacle to receiving international students has been the language, as all the courses at Hedmark University College have been in Norwegian. We are therefore pleased to announce that we now are offering courses in English.

Many more of you will therefore have the opportunity to study in Hedmark, so come and add some more international flavour to our lives!

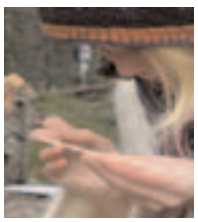

Arne Amlien
Rector

Hedmark University College

Hedmark University College is among the largest of the university colleges in Norway (3700 students). The college provides high standards and modern, research-based teaching.

The University College consists of five faculties located at six different centres of learning: **The Faculty of Education** with programmes offered at Hamar and Elverum, **The Faculty of Health Studies** in Elverum, **The Faculty of Agriculture and Natural Sciences** at Blæstad (on the outskirts of Hamar), **The Faculty of Business Administration, Social Sciences and Computer Science** at Rena, and **The Faculty of Forestry and Wildlife Management** at Evenstad.

Hedmark University College has an increasingly active international campus and cooperates with universities in the United States, in Africa (Namibia), in Asia (Thailand), Australia and in Europe. The College is highly involved with European education programmes such as Socrates and Nordplus. These programmes give students and staff an opportunity to study, teach or do research at other universities in Europe.

The language of instruction is Norwegian and foreign students who follow courses in Norwegian should have a satisfactory command of the Norwegian language (a score of at least 450 points on the Bergen Language Test).

From the autumn of 2003 the College will be offering courses taught in English at the faculties, allowing for freer movement of international students. There will be no Norwegian language requirements for foreign students attending these courses.

We stress the importance of taking good care of our students. Emphasis is placed on close contact between lecturers and students through guidance.

An introduction course will be organised each semester, as well as social events at the various campuses, enabling international students to get to know the different centres of learning and their fellow students. Moose safari at Evenstad, picking potatoes at Blæstad or taking part in a “spark” (kicking sledge) competition between Rena and Elverum are examples of some of the social events.

Information concerning courses, admission and other practicalities can be found on our web pages: **www.hihm.no,**

or by contacting the international office;

Hedmark University College,
International Office,
2418 Elverum, Norway.

At Hedmark University College we are committed to making our students feel welcome.

At Hedmark University College we are committed to making our students feel welcome. In general, students seem to think that this is an enjoyable place to be. Competent and inspiring lecturers provide students with a sound education, and no matter what you are studying you are ensured close and efficient personal follow-up. The student environment is active, intimate, well organised and inclusive. For those who seek a bit of solitude, there are plenty of opportunities for walking, hunting, fishing and outdoor pursuits all year round.

As with all other things, your time at HUC becomes what you make of it, with good help from lecturers, friends and fellow students. All the centres of learning enjoy an active student life, including a students' association, pubs and clubs, a student orientation week with shows, concerts and other activities, sports clubs, choirs and bands, chess and bridge clubs etc.

Each centre of learning enjoys its own social and cultural institutions and activities. There are cinemas, theatres and concert halls, and a wide range of clubs and associations. You will find plenty of restaurants and pubs, city centre shops and shopping malls, sports halls etc. Everybody who can remember the Winter Olympics in 1994 can picture the fantastic Viking ship in Hamar, where the Norwegian speed skater Johan Olav Koss won his gold medals and set those impressive world records. Today the Viking ship is crammed-full of activities all year round.

In addition to all the activities associated with the individual centres of learning, Hedmark's nature presents a wealth of opportunities: large pine forests with cranberries, blueberries and mushrooms, small idyllic lakes teeming with fish, a varied wildlife to tempt both those interested in photography and hunting, skiing terrain and footpaths, not to mention the River Glomma with its opportunities for bathing, fishing and canoeing. And let us not forget Mjøsa, Norway's largest lake. As people say around here: "It doesn't matter where I am in the world, as long as I can see Mjøsa!"

Secure you future, enjoy your life as a student!
In many ways, your student years are the most important times of your life.
This is when you will lay the professional foundation for your working career. However, it is equally important that you develop as a person. Good friends, personal challenges, cultural activities, parties, discussions, sports, experience of nature, falling in love; they are all as important to your personal growth and development as choosing the right studies.

Therefore, it is crucial that you enjoy being a student. Your student years present a chance to explore life's many opportunities, both academic and personal.

How to make ends meet?
We can't pretend that Norway is a cheap country to live in, but as a student at Hedmark University College you will discover that your money lasts much longer than if you'd been a student in one of the bigger cities like Oslo, Bergen or Trondheim.

Firstly, the distances from your accommodation to lectures, reading rooms and all other types of activities tend to be shorter here. You can walk or cycle most places, whereas you might have had to use money for public transport elsewhere. Obviously it is also easier and much cheaper to participate in night-time activities when you don't have to spend a lot of money on taxis after the last bus or tram has left!

Secondly, your student accommodation is likely to be cheaper than similar accommodation in a city with more students concentrated in one area.

And thirdly, the food on offer at the HUC canteens is both good and inexpensive compared to other places.

As a new student at HUC you don't have to worry about finding a roof over your head. The Student Welfare Association in Hedmark guarantees accommodation for all first year students. International students are regarded as new students the first year they study at Hedmark University College. The Student Welfare Association has around 500 rooms and flats, all of which enjoy a high standard, good maintenance and reliable caretaker services.

The Student Welfare Association also offers kindergarten places, so don't let the fact that you've got young children prevent you from pursuing your studies at HUC. From starting this service in 1995, the Student Welfare Association has provided places for everybody who's applied.

The centres of learning

Hamar

Hamar is the regional capital of Hedmark with approximately 25 000 inhabitants. The city has a vibrant and versatile cultural life with many clubs and associations. The Cultural City Hamar celebrated its 150th anniversary in 1999. Hamar Teacher Training Seminarium was established in 1867. The city is also known as «The Sports City on the shores of Lake Mjøsa» for its wide variety of sports centres and sports grounds. Sports clubs and recreational activities welcome students, both experts and those who take exercise on a less serious level. The Faculty of Education at Hamar has approximately 1 000 students.

Blæstad

The Faculty of Agriculture and Natural Sciences at Blæstad is situated in rural surroundings 7 kilometres from the centre of Hamar, in the middle of Hedmark's dynamic agricultural region. Here a modern and well-developed college faculty has been established with lecture theatres, laboratories and workshops.
The faculty also has at its disposal 100 acres of arable land and a rich selection of machinery, which is used in the teaching. The Faculty of Agriculture and Natural Sciences has approximately 200 students.

Elverum

Elverum is a regional centre in the heartland of Hedmark with approximately 18 000 inhabitants. The area enjoys long traditions as a centre of learning. Teacher education has a century-long history in Elverum and nurses have been educated in Elverum for the past 75 years. Today the town is a modern town with charming residential areas on the edge of the countryside, offering bustling shops, vibrant cultural and sports activities and plenty of opportunities for leisure activities and outdoor recreation. The cold winter climate gives excellent opportunities for winter sports, particularly cross-country skiing. From Elverum it is only one hour by bus to Trysil, where you can find Norway's largest downhill skiing centre. Elverum is the geographic centre between the different faculties. From here, Rena, Hamar and Blæstad can be reached in less than half an hour, while Evenstad is one hour away by car.
The Faculty of Education in Elverum has around 700 students, and the Faculty of Health Studies around 650 students. The central administration of Hedmark University College is situated next to the faculties of Education and Health Studies. This joint administration serves all five faculties and has around 25 staff.

Rena

Rena is the municipal centre of Åmot, where the Rivers Glomma and Rena meet. The township, with around 3 200 inhabitants, is growing and boasts many well-developed services. Rena has rich sports traditions and enjoys good facilities for golf, swimming, football, parachuting, tennis, cross-country skiing and slalom, to mention but a few. In the autumn of 1999 a new community centre was built which includes two cinemas, and offers a varied selection of plays and concerts. A new, well-equipped college building in the centre provides modern teaching facilities which, along with the available services for student welfare, ensure an active student environment. All the auditoriums enjoy integrated audio, light, video and computer equipment. The Faculty of Business Administration, Social Sciences and Computer Science has around 900 students and 45 teaching staff. The faculty enjoys an active and enjoyable student environment in which the students' own organizations play a decisive role.

Evenstad

The Faculty of Forestry and Wildlife Management at Evenstad has been in existence for almost 100 years. The faculty is situated in modern buildings next to the River Glomma and is surrounded by forests and mountains. Particular for this area is the presence of all species of Nordic large deer and carnivores, and the long tradition of forestry, hunting and fishing. Students interested in outdoor activities will appreciate this natural environment and they have access to a number of cabins in the surrounding area. Koppang, the municipal centre, has 1 500 inhabitants and offers a wide variety of services. The Faculty of Forestry and Wildlife Management has 130 students.

Hamar – The Faculty of Education

Elverum – The Faculty of Education

Rena – The Faculty of Business Administration, Social Sciences and Computer Sciences

Blæstad – The Faculty of Agriculture and Natural Sciences

Elverum – The Faculty of Health Studies

Evenstad – The Faculty of Forestry and Wildlife Management

The Faculty of Education at Elverum and Hamar

The Faculty of Education provides vocational teacher education with three main elements: education in individual subjects, which forms the basis for learning and teaching, pedagogical education, and practical education. The combination of these elements forms the core of teacher education and makes it a profession and job-oriented education.

The Faculty of Education is also involved in the delivery of courses and programmes in minority education, the IT based teaching principles of music, and the vocational teacher education programme in physical education.

Four-year programmes (240 ECTS)
- General Teacher Education (Elverum and Hamar)
- General Teacher Education, with specialization in Music (Hamar)

The four-year programmes qualify for a Bachelor degree after three years.

Bachelor Degrees (180 ECTS, three years)
- Pre-School Teacher Education (Hamar)
- Physical Education Teacher Education (Elverum)
- Recreation and Health Promotion (Hamar and Rena)
- Children and Youth Sports (Elverum)
- Language and Culture Studies (Hamar)
- Interactive Media Creative Arts (Hamar and Rena)

One-year programmes (Basic subjects - 60 ECTS)
- English (Hamar)
- Norwegian (Hamar)
- Physical Education (Elverum)

Add-on programmes (30 ECTS)
- Drama (Hamar)
- English (Hamar)
- Multicultural Education (Hamar)
- Religion and Ethics (Hamar and Elverum)
- Arts and Crafts (Elverum)
- Mathematics (Elverum)
- Music (Hamar and Elverum)
- Natural Science and Environmental Studies (Elverum and Hamar)
- Social Sciences (Hamar)
- Social Pedagogy (Elverum)
- Physical Education
- Special Needs Education

Add-on programmes (60 ECTS)
- Postgraduate Certificate in Education (Elverum and Lillehammer): a practical and vocational part-time study over 2 years.
- IT for teachers (Hamar)

Hamar – a hot place to be!

"There is no doubt about it - Hamar has one of the "hottest" places to study in the country! This is maybe not so strange, considering it has a place called "Brannvakta" (the fire station), which comprises lecture theatres, reading rooms, conference rooms and auditoriums, as well as a large concert hall called "Hydranten" (the hydrant) where there is a stage and room for up to 400 people. Here, students organise concerts, theatre performances, lectures, shows, and large meetings of all sorts.

Finally, "Brannvakta" houses a pub called "Svampen" (the sponge) where you can go and share you joys and sorrows, and exchange views, with your fellow students. From the crack of dawn until the small hours, the "student brigade" makes sure there is plenty going on at the old fire station all year round. It's all "happening" here - from the Mammoth party at the start of the year, to the New Year's Ball, student orientation week and end-of-exam parties. A brand new accommodation block comprising 96 bed-sits and flats is already under construction, to be completed by the start of the academic year 2003.

The Faculty of Health studies in Elverum

The nursing programme is based on a national framework plan for the 3-year foundation programme in nursing. The foundation programme in nursing gives 180 ECTS credits and will lead to a wide field of experience which enables nurses to meet the needs of individuals and groups alike, no matter their age and health. The programme enables newly qualified nurses to apply for admission to the professional register of nurses in Norway.

The faculty also offers a wide variety of other further studies, courses and seminars. On offer at present are further studies in cancer care, mental health care, rehabilitation, abuse problems, in supervision and in the disciplines of anaesthetics, intensive and operative nursing. Each year 190 students are admitted to the foundation programme in nursing, 40 of which are admitted at the decentralized centre of learning in Kongsvinger or at Tynset. Around 30 students are also admitted to the further education programme in mental health each year.

Bachelor programmes:

- Bachelor Programme in Nursing (180 ECTS): The foundation programme in nursing is divided into these disciplines /fields: Nursing, the social basis of nursing and the scientific basis of nursing.

Add-on programmes:

- Rehabilitation, interdisciplinary part time study (60 ECTS)
- Abuse problems, interdisciplinary part time study (60 ECTS)
- Mental Health Care, interdisciplinary full time study (60 ECTS)
- Supervision, part time study (30 ECTS)

Elverum – learning and fun in perfect harmony!

Those who have studied in Elverum are convinced that it is the nicest place to study in the whole of Norway. The students here are a significant element in the local community.

Student life is full of academic challenges, parties, stand-up comedy acts, shows, concerts, not to mention social evenings at the students' own pub. Pub nights are as unlikely to become part of the syllabus in Elverum as at other colleges but there are probably those who have learned a thing or two at "Pensum Pub" (the syllabus pub) of a late night. Here, too, the New Year's Balls are the most exciting party events of the year. Every February there is a student activity week, which caters for all types of interests.

The Faculty of Agriculture and Natural Sciences at Blæstad

The programmes of study offered at the faculty focus on the utilisation of natural resources, managing environmental problems, biotechnology, crop production and technical courses related to agriculture. The studies combine theoretical learning with practical work in laboratories and/or in the field and machine shops. They qualify students for a variety of positions in, amongst others, environmental management, agriculture, laboratories and industry. The programmes are also well suited for further studies at universities and research institutes.

Many of our candidates continue their studies at the Agricultural University of Norway at Ås (NLH). Hedmark University College and NLH have entered into an agreement that allows graduates with a bachelor degree from Blæstad to continue studying for two additional years at NLH in order to qualify for a master degree.

In addition to teaching, the Faculty of Agriculture and Natural Sciences engages in research and development and the faculty maintains contact and collaboration with research institutes and organisations linked to agriculture, environmental management and biotechnology in the region, in Norway and abroad.

Bachelor programmes (180 ECTS):
- Agricultural Techniques
- Agricultural Techniques with Business Administration
- Organic Agriculture
- Organic Agriculture with Business Administration
- Biotechnology
- Environmental Management
- Environmental Biotechnology

One-year programmes (60 ECTS):
- Natural Sciences

Add-on programmes (60 ECTS):
- Agricultural Techniques
- Organic Agriculture
- Biotechnology
- Environmental Management

Blæstad – you won't disappear in the crowd here!

At Blæstad, students live in close proximity to nature. Among the students there is a feeling of community and belonging. The faculty is beautifully situated close to forests and agriculture. The pub is central to the social life at Blæstad. Activities range from pub nights and quizzes to carnivals and theme nights. Hamar is only 7 km away, and students from Blæstad are a natural part of the hustle and bustle and the numerous activities that take place at Brannvakta, Hydranten and Svampen Pub. As a student at Blæstad you get the best of both worlds. You can't get much better than that!

The Faculty of Forestry and Wildlife Management at Evenstad

The faculty offers 3-year bachelor programmes as well as 1-year programmes in Forestry and Wildlife Management. Forestry courses cover practical and theoretical aspects of forest ecology, engineering, economics and wood technology, whereas wildlife management courses focus on ecology and management of game species, predators and fish.

Common to both subjects are compulsory and elective courses in e.g. geobotany, GIS, land planning and nature guiding. Upon completion of their studies, students will be qualified for a variety of forest and wildlife manager positions, or for continuing their academic career at university.

The faculty's research projects on moose, wolves, red deer, ptarmigan, mountain hares, and freshwater fish offer students an opportunity to participate actively in fieldwork. The University of Oslo (UiO) and the Directorate of Nature Management (DN) have permanent field stations at Evenstad. The faculty is also responsible for the running of a fish hatchery farm.

Bachelor programmes (180 ECTS):
- Forestry
- Wildlife Management

One-year programmes (60 ECTS):
- Forestry
- Wildlife Management

Evenstad – for those who love nature and outdoor pursuits!

At Evenstad, where the sky is high, you will find large forests and twinkling tarns, fishing lakes and hunting grounds, pine trees heavy with snow and, in autumn, blushing cranberries. You can make use of two cabins and several small huts, there are hunting and fishing associations, for the chosen there are opportunities for moose hunting, there is a skating rink and lots more.

Everybody knows everybody and in the students' own pub you'll always find cheerful people. A full range of activities takes place every year, including highlights such as the New Year's Ball, Thanksgiving and the ceremonial baptism of new students in the River Glomma. Students at Evenstad belong to the students' association at Rena, where there is a wide variety of activities on offer.

The Faculty of Business Administration, Social Sciences and Computer Science at Rena

The programmes on offer are of one, two and three years' duration. They are vocational and qualify students for a wide range of positions at a variety of levels in trade and industry, as well as in public administration. For those who wish to continue their education or who have experience from a number of fields, the faculty can offer several interesting courses and combinations. The faculty also enjoys agreements with other educational institutions, giving opportunities for transfers to further studies both in Norway and abroad.

Bachelor programmes (180 ECTS):
- Auditing
- Business Administration
- Business Administration with Administrative Data Processing
- Interactive Media Creative Arts
- Business Administration with Marketing and Internationalisation
- Local Government Economics
- Public Relations Management
- Computer Science with Distributed Multimedia
- Computer Science with Systems Development

Other programmes:
- Business Administration (60 ECTS)
- Business Administration (120 ECTS)
- Public Relations Management (120 ECTS)
- Media Studies (60 ECTS)
- Administration and Management (60 ECTS)
- Communication and Society (60 ECTS)
- Computer Science (120 ECTS)
- Administrative Data Processing (60 ECTS)
- Innovation, Entrepreneurship and Business Development (60 ECTS)

Advanced studies/add-on programmes (60 ECTS):
- Marketing and Internationalisation
- Local Government Economics
- Organization and Management
- Systems Development
- Distributed Multimedia
- Auditing

Rena – where everybody enjoys themselves and anything can happen!

Many claim that the student environment at Rena is the best in Norway and has been so for many years. The new hall of residence, which opened in the summer of 2000, has certainly contributed to students enjoying living here and, as for the activities on offer, you'll find practically everything you could wish for. There are parties, stand-up comedy acts, theatre and other shows, concerts, super-weekends and lots more. The new community hall provides opportunities for cultural events and gatherings. Last but not least, there's the ultra modern sports facility at the Rena Leir (Camp Rena), which is available for all to use, no matter what their fitness level..

Courses in English at Hedmark University College

A wide range of the courses at Hedmark University College will from the autumn semester of 2003 be taught in English. One of these courses is specially designed to meet the requirements of English speaking students. The course called "Society and Culture"- A Cross-Cultural Perspective on the Norwegian Welfare State, has been developed in collaboration with Pacific Lutheran University, USA and the University of Namibia, in Namibia.
The idea of the course is to make the perspectives of democracy and development an active framework of the individual student s mind, irrespective of what topic the individual is studying.

The course, which lasts one semester, gives 30 ECTS credits and consists of four modules, where the first is compulsory and the other three can be read subsequently, according to the student's academic background and aims for doing the course.

The Faculty of Education, the Faculty of Business Administration, Social Sciences and Computer Sciences and the Faculty of Forestry and Wildlife Management will be offering the modules taught during the academic year 2003-2004. As the College gains experience in teaching the course, we hope that all the faculties at Hedmark University College will contribute with modules.

Courses on offer:

1. The Faculty of Education:

- **Bachelor of Language and Culture:** The Bachelor degree in Language and Culture consists of modules which are already taught at Hedmark college. The degree is designed to give students a basic competence within language and cultural studies, equipping them for further academic studies, professional studies or employment within relevant areas. The modules will be offered in English upon request.
- **Introduction to the Norwegian Welfare State** (10 ECTS). The module is a compulsory introduction to the semester programme "Society and Culture- A Cross-Cultural Perspective on the Norwegian Welfare State". The module is a further development of Hedmark University College's International Summer School, organised in 1999 and 2001. International students may take the module as a separate unit.
- **Democracy and Development in a Cross-Cultural Perspective** (10 ECTS)* The module focuses on Norway's international role and particularly our relationship to the developing countries.
- **Communication through Music, traditional and contemporary Norwegian Music.** (10 ECTS).*
- **"Needs and Desires — New Perspectives on Consumer Education"** (10 ECTS).*
- **Norwegian Language and Culture** (10 ECTS).* This module provides students with the opportunity to develop basic Norwegian skills.

2. The Faculty of Health Studies:

- In connection with the UNISKA collaboration (a Nordic network) and the development of a master study in Community Care, the faculty may offer modules in English.

3. The Faculty of Agriculture and Natural Sciences at Blæstad:

- Molecular Biology (9 ECTS)
- Molecular Biology (15 ECTS)
- Weed control in organic agriculture (6 ECTS).

The faculty may be offering courses in **food safety** shortly.

4. The Faculty of Forestry and Wildlife Management:

Autumn semester:

- Applied Forest Management (6 ECTS)
- Applied Moose Management (6 ECTS)
- Forest and Society (6 ECTS)
- Ecotourism (6 ECTS)
- Field Biology (6 ECTS)
- Practice in Forest Management (6-12 ECTS).
- Practice in Wildlife Management (6-12 ECTS)
- **Management of Nature Resources in Norway** (10 ECTS).*

The module includes the courses "Forest and Society", "Applied Forest Management" and/or "Ecotourism".

Spring semester:

- Field Biology (6 ECTS)
- Advances in Wildlife Management (6 ECTS)
- Practice in Forest Management (6 ECTS)

5. The Faculty of Business Administration, Social Sciences and Computer Science:

Autumn semester:

- Communication and the Media (10 ECTS).*
- One-semester Business Administration with Marketing and Internationalisation (30 ECTS) with the following courses:

1. International Marketing.
2. Strategic E-Marketing
3. Industrial Marketing
4. Business English
5. Business Strategy II + project

- One-semester Computer Science (30 ECTS).

The courses offered each semester will vary and the faculties may offer more of their ordinary courses in English upon request.
For more information concerning the courses at Hedmark University College, please take a look at our web pages! (http://www.hihm.no)

*The module is offered as part of the semester programme "Society and Culture- A Cross-Cultural Perspective on the Norwegian Welfare State".
