

USING THE DIACRITIC FONTS JAGHBUB ETC

Install the fonts and the “diacs” file of your country in the System. Choose the ‘diacs’ from the keyboard menu (menu bar or Keyboards control panel). You then get the characters through these key combinations: (O=Option key, S=Shift key). When the font is installed, you will see the characters in the second column. (Norwegian and Swedish users do not need a ‘diacs’ keyboard).

Character		US diacs	France d	Italy d	Deutsch D	Danish d	Norw/Sweden.
s + dot under	ş	O-s	O-s	O-s	O-s	O-s	O-s
S + dot under	Ş	O-S	O-S	O-S	O-S	O-S	O-S
d + dot under	đ	O-d	O-d	O-d	O-d	O-d	O-d

Notes:

*** Not available in Norwegian / Swedish.

- Swedish and Norwegian keyboards differ only in one point, T , which Norway has under Option-4, Sweden under Shift-4 (no option).
- UK and US keyboard files are identical for the diacritics (differ on £ only)
- Notice that $\text{ü}/\text{Ü}$ have different locations in these fonts than in the standard fonts. This is particularly important in Germany. While ü , Ü and ß are located on the same keyboard position in Jaghbug and in Times, they are different letters. Thus, for German, the Deutsch Diaks keyboard should *only* be used with the Diacritics fonts, not with standard German fonts. (In Norway/Sweden only, ¨ and u will produce $\bar{u}$ in Jaghbug, not ü . In other countries, it will follow keyboard and font: with a Diacs keyboard layout and Jaghbug, ¨+ u will give ü correctly. With a Diacs keyboard and Times or other, ¨+ u will give μ).
- These characters have been moved in relation to the standard keyboard:
US-UK, France, Denmark: $\text{ü}/\text{Ü}$ to O-y/Y
US-UK: $\text{å}/\text{Å}$ to O-p/P
 ^ to O-x
¨ to O-m
 ¬ to O-9
 ; to SO-0
France: $\text{å}/\text{Å}$ to O-q/Q
 $\text{æ}/\text{Æ}$ to O-8 / SO-8
 ; to SO-=
Denmark: ; to SO-´
Germany: ; to O-J
 ¬ to SO-8
¨ (umlaut accent key) to O-m. Umlaut alone: O-M
