Hooked hausa characters, JaghbUni only (not KoufrUni, BairUni)
Deadkey is: m

k	ƙ	k
K	Ƙ	K
d	ɗ	d
D	Ɗ	D
b	ɓ	b
B	Ɓ	B

Explanations:

S : Shift [thus, ”S 5” is press Shift+Option+5).
- : ”deadkey”, dvs. trykk Option-/ [slash] and then the indicated letter.
(For the Hausa characters, the deadkey is m, not /)
To add ”loose diacritcs” to any letter (here exemplified by on an o), you write in Unicode first the letter and then the diacritic/accent; not the other way around as we used to in ”old” Jaghbub.
