Welcome to The Cochrane Library 2004, Issue 4

the best single source of reliable evidence about the effects of health care

The Cochrane Library is a unique source of reliable and up-to-date information on the effects of interventions in health care. Published on a quarterly basis, The Cochrane Library is designed to provide information and evidence to support decisions taken in health care and to inform those receiving care.

The Cochrane Library consists of a regularly updated collection of evidence-based medicine databases. The databases and the current numbers of records are:

Database	Total Records
The Cochrane Database of Systematic Reviews (Cochrane Reviews) *	3670
Database of Abstracts of Reviews of Effects (DARE)	4918
The Cochrane Central Register of Controlled Trials (CENTRAL)	427807
The Cochrane Database of Methodology Reviews (Methodology Reviews)	18

Trefflista presenteres base for base. Klikk på lenkene for å se treff fra de enkelte basene

Abstract

Background

Approximately 30 per cent of people over 65 years of age and living in the community fall each year; the number is higher in institutions. Although less than one fall in 10 results in a fracture, a fifth of fall incidents require medical attention.

Objectives

To assess the effects of interventions designed to reduce the incidence of falls in elderly people (living in the community, or in institutional or hospital care).

Search strategy

We searched the Cochrane Musculoskeletal Injuries Group specialised register (January 2003), Cochrane Central Register of Controlled Trials (The Cochrane Library, Issue 1, 2003), MEDLINE (1966 to February 2003), EMBASE (1988 to 2003 Week 19), CINAHL (1982 to April 2003), The National Research Register, Issue 2, 2003, Current Controlled Trials
